## RESEARCH INTERESTS

My long term vision is to create fully and partially autonomous robots that work alone, in collaboration with humans, and with other robots, continuously learning and updating their behaviors through interacting with humans as well as the environment. My work is interdisciplinary, drawing from the methods and theory of robotics, machine learning, and artificial intelligence. My research interests include robot learning from demonstration, sliding autonomy through learning, multi-sensor perception, high-fidelity high-performance data-driven robot and sensor simulation, mixed-initiative human-robot collaboration, human behavior understanding, computer vision, and multi-robot coordination.

## RESEARCH EXPERIENCE

Carnegie Mellon University, Pittsburgh PA, USA

Special Faculty - Commercialization Specialist

**2015 - Present**

Senior Robotics Engineer

**2013 - 2015**

- *DARPA GXV-T Program*. As the machine learning and perception lead, I am conducting and managing research and development efforts on subjects such as long range obstacle detection, high speed high performance perception, and imitation learning.
- *DARPA ALIAS Program*. As a researcher, I am developing semi-autonomous in-flight assistance tools for the aircraft pilots using imitation learning, inverse reinforcement learning, perceptual state estimation, and pilot gaze and gesture recognition.
- *FHWA Snowplow*. As a researcher, I am developing robust mapping and in-lane position estimation methods using perception and machine learning for snowplow vehicles to prevent accidents due to poor visibility of the road features under heavy snow.
- *TRMC Data Driven Tools Virtualization Program*. As the project lead, I led the development of a state-of-the-art mapping sensor hardware as well as numerous software tools for efficient large scale virtualization of robot test sites. We convert data logs of a robot test site into a highly realistic but virtual test environment for mobile robots using our cutting-edge realistic data-driven sensor and mobility simulation technologies.
- *Elderbot Therapy Robot*. As the lead researcher, I oversee the development of a low-cost programmable therapy robot. We also develop proper interaction methods and interfaces for non-technical robot operators to interact with elder dementia patients with degraded vision/hearing.

Post-doctoral Fellow

**2011 - 2013**

- My work mainly focused on expanding the capabilities and the overall performance of mobile service robots operating in complex real world environments by complementing and updating the existing robot controllers with corrective human feedback. I also co-taught an undergraduate introductory course, and supervised a team of students who work on related projects such as fast and robust human detection using depth images, realistic 3D simulation of indoor environments including simulated crowds, and updating robot behavior using corrective feedback.

Member, CMurfs RoboCup Standard Platform League Team **2010**

- I worked on the ball dribbling challenge where I utilized learning from corrective demonstration methods I contributed in my PhD thesis. I also developed a modular software infrastructure, an effective motion interface, and a faster vision module. CMurfs finished 3<sup>rd</sup> in the technical challenges out of 25 teams, and 4<sup>th</sup> in the SPL soccer competitions out of 24 teams in RoboCup 2010.

Member, CORAL Research Group **2009 - Present**

- I conduct research on learning and refining complex tasks and low level skills on various robot platforms including humanoids and mobile service robots using corrective human demonstration.

Boğaziçi University, İstanbul, Turkey

Research Assistant **2007 - 2009**

- As a member of the project “Development of Decentralized Partially Observable Markov Decision Process Algorithms for Multi-robot Teams”, I developed appropriate metrics that build upon my MS thesis for the learning and evaluation of soccer playing skills, and I implemented approximate DEC-POMDP solutions.

Member, Cerberus RoboCup Standard Platform League Team **2003, 2009**

Team leader, Cerberus RoboCup Standard Platform League Team **2004 - 2008**

- I applied multi-agent task allocation algorithms I developed in my MS thesis to both Aibo four-legged robots and Nao humanoid robots. I also led and participated in the development of sophisticated debugging tools, high performance low-level robot vision, planning and behavior, wireless communication, and probabilistic self-localization modules. Cerberus won the technical challenges in 2005, and reached the quarterfinals in 2006 and 2008.

## TEACHING EXPERIENCE

Carnegie Mellon University, Pittsburgh PA, USA

**15-491 - CMRoboBits**, an undergraduate course **2009,2011,2012**

- I have assisted (2009) and co-taught (2011, 2012) with Professor Manuela Veloso. In the class, we challenge the students with simplified versions of actual research problems. I supervise the student teams and oversee the class projects. I also work closely with the teaching assistants to provide access to various low-level functionalities like object detection and motion primitives. Providing such functionalities helps the students focus on the actual research problem instead of dealing with engineering issues. Every year, the students succeed remarkably in completing sophisticated concrete projects using a diverse set of real robots.

Boğaziçi University, İstanbul, Turkey

**CmpE49A - Introduction to Robotics**, an undergraduate course **2007 - 2010**

- I helped creating the course from scratch. In particular, I was in charge of designing, supervising, and evaluating the laboratory sessions and the term projects of the course as well as covering some topics in the lectures. The course received very positive student feedback for four years in a row after its inception in 2007, and became a regular elective course in 2011.

**CmpE565 - Autonomous Robots**, a graduate course

**2005 - 2009**

- I was in charge of designing, supervising, and grading the term projects as well as lecturing on some topics such as kinematics and probabilistic self-localization.

## FUNDING EXPERIENCE

- Co-author, NSF small grant on “Natural Language-Based Human Instruction for Task Embedded Robots”, 2012 (\$300,000)
- Co-chair, Republic of Turkey Prime Ministry promotion fund for RoboCup 2011 (€300,000)
- Researcher, The Scientific and Technological Research Council of Turkey (TÜBİTAK) grant on “Development Of Decentralized Partially Observable Markov Decision Process Algorithms For Multi-Robot Teams”, 2007 (\$100,000)

## EDUCATION

Boğaziçi University, İstanbul, Turkey

Ph.D., Computer Engineering

**2011**

- Thesis Title: Multi-resolution Model Plus Correction Paradigm for Task and Skill Refinement on Autonomous Robots
- Advisors:
  - Professor H. Levent Akın
  - Professor Manuela Veloso, Carnegie Mellon University

M.S., Computer Engineering

**2005**

- Thesis Title: Developing a Novel Robust Multi-agent Task Allocation Algorithm for Four-Legged Robot Soccer Domain
- Advisor: Professor H. Levent Akın

Marmara University, İstanbul, Turkey

B.S., Computer Engineering

**2002**

- Thesis Title: Sensor Optimization in a Virtual Landscape with Genetic Algorithms
- Advisor: Professor Haluk Topçuoğlu

## SERVICE

- Program committee member, AAMAS (2015)
- Grant Proposal Referee, Israeli Science Foundation Individual Research Grants (2015)
- Guest editor, Software Quality Journal “Special Issue on Realizing Artificial Intelligence Synergies in Software Engineering” (2014)
- Co-chair, 3rd Workshop on Realizing Artificial Intelligence Synergies in Software Engineering (RAISE) (2014)
- Program committee member, AAAI (2014)
- Program committee member, ECAI (2014)

- Program committee member, ICML (2014)
- Program committee member, ICMI (2014)
- Program committee member, SIU (2014)
- Guest editor, IEEE Transactions on Autonomous Mental Development “Special Issue on Behavior Understanding and Developmental Robotics” (2013)
- Program committee member, ICAR (2013)
- Program committee member, IJCAI (2013)
- Program committee member, AAAI Cognitive Systems Track (2013)
- Program committee member, AAAI Robotics Track (2013)
- Program committee member, International Conference on Advanced Robotics (ICAR) (2013)
- Chair, AAAI Fall Symposium on “Robots Learning Interactively from Human Teachers (RLIHT)” (2012)
- Organizer, “Third International Workshop on Human Behavior Understanding (HBU’12)” at IROS’12 (2012)
- Co-chair, RoboCup 2011 (more than 2800 participants from 41 countries, with an estimated budget of  $\sim\text{€}700.000$ )
- Founding member, RoboCup Turkey National Committee (2011 - Present)
- Co-chair, Workshop on “Humanoid Robots Learning from Human Interaction” at IEEE/RAS Humanoids’10 (2010)
- Local organization committee member, “NATO ASI 2010: Advanced All-Terrain Autonomous Systems” (2010)
- Local organization committee member, CLAWAR’09 (2009)
- Program committee member, RoboCup Symposium (2009 - Present)
- Organization committee chair, RoboCup Standard Platform League (2009)
- Organization committee member, RoboCup Standard Platform League (2007-2008)
- Referee, FIRST Lego League Turkey (2008)
- Editor, Journal of Unmanned System Technology (JUST)
- Reviewer, IEEE Transactions on Robotics, Autonomous Robots, International Journal of Social Robotics, International Journal of Humanoid Robots, IEEE Transactions on Education, Environmental Modelling and Software, Computational Intelligence, Journal of Intelligent and Robotic Systems, Journal of Autonomous Agents and Multi Agent Systems, IEEE International Conference on Robotics and Automation (ICRA), IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS), American Control Conference (ACC), ACM International Conference on Multimodal Interaction (ICMI)

## INVITED TALKS

- “Closing the Loop in Autonomous Robotic Systems: From Scientific Ideas to Implementation Details”, National Robotics Engineering Center, The Robotics Institute, Carnegie Mellon University, 2013 (Host: Dr. Peter Rander)
- “An Overview of Contemporary Robotics Research”, Computer Engineering Department, Okan University, Turkey, 2012 (Host: Dr. Asli Uyar)
- “An Overview of Contemporary Robotics Research”, Computer Engineering Department, Galatasaray University, Turkey, 2011 (Host: Serhan Daniş)

- “Multi-resolution Model Plus Correction Paradigm for Task and Skill Refinement on Autonomous Robots”, TAM Research Center, Boğaziçi University, Turkey, 2011 (Host: Dr. Özlem Durmaz İncel)
- “Robotics Research at Carnegie Mellon University”, Computer Engineering Department, Boğaziçi University, Turkey, 2010 (Host: Professor Lale Akarun)
- “Improving Biped Walk Stability Using Real-time Corrective Human Feedback”, Learning, Artificial Intelligence, and Robotics Laboratory (LAIRLab), Carnegie Mellon University, 2010 (Host: Professor Drew Bagnell)
- “Cerberus RoboCup 4-Legged Robot Soccer Team”, Computer Engineering Department, Istanbul Technical University, Turkey, 2007 (Host: ITU Robotics Club)
- “RoboCup 4-Legged Soccer League: Challenges and Approaches”, Computer Engineering Department, Marmara University, Turkey, 2007 (Host: Marmara University IEEE Student Branch)
- “An Overview of RoboCup”, The Chamber of Mechanical Engineers, Turkey, 2007 (Host: Devrim Kartal)

## AWARDS AND HONORS

- Recipient of The Scientific and Technological Research Council of Turkey (TÜBİTAK) Programme 2214 Scholarship (awarded to 5 CS PhD students nationwide) (2009)
- First place in RoboCup 2005 4-Legged League Technical Challenges as the student leader of the Cerberus team (2005)
- Third place in RoboCup 2010 Standard Platform League Technical Challenges as a member of the CMurfs team (2005)
- Completed undergraduate study with high honors, ranked 2<sup>nd</sup> out of 40 students (2002)

## INDUSTRY EXPERIENCE

**i Bilgişim Ltd. Şti.**, İstanbul, Turkey

Co-founder

**2007 - 2011**

- Developed a commercial robotic mannequin that can interact with humans and imitate motions. The mannequin has a soft body and a metal skeleton articulated with cable-driven joints. The main challenge there was to develop a thin but powerful enough skeleton that can fit in the smallest size female mannequin body.
- Developed an omni-directional mobile robot base equipped with an articulated stereo camera system for general purpose robotics research. We engineered a design that allowed us to replace some expensive equipment with low-cost counterparts without losing agility, payload, or robustness.
- Developed a robotic head with rich expressive abilities for human-robot interaction research. Instead of articulated eyes and mouth, we used high brightness LED matrices that enabled a richer set of expressions to be displayed.

**Arçelik A.Ş.**, İstanbul, Turkey

Senior Software Engineer

**2004 - 2007**

- Developed several large-scale business workflow applications on the intranet web for approximately 1000 concurrent users.

- Designed the first distributed implementation of Microsoft SharePoint portal in Turkey as a part of the development team.
- Led the migration process of the entire IT department (approximately 150 developers) to the new project management framework using Microsoft Project Professional.
